Invention	Examiner	Art Unit
Air Hypocaust Structure for Cooling and/or Heating		3743

PRELIMINARY AMENDMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Prior to examination, please amend the application as follows:

IN THE WRITTEN DESCRIPTION:

Please enter the following paragraph as a replacement for the paragraph beginning on page 2, at line 17:

The present invention improves Korean U.M. Invention Registration No. 0309710, entitled "a method of installing an air hypocaust structure for constructing eooling and/or heating and cooling system a dwelling" and filed by and allowed to the inventor of the present invention, in which a heat transfer rate through a concrete layer is slow and the heat dissipation through the concrete layer is considerable because a part of the concrete layer positioned in a recess part of an uneven panel constituting the hypocaust structure is thick. Furthermore, in Korean U.M. Invention Registration No. 0309710, entitled "a method of installing an air hypocaust structure for constructing eooling and/or heating and cooling system a dwelling", a cold or hot air current flows linearly in the air hypocaust structure. The improvement, accomplished by the present invention, is to selectively change a flow direction of a cold or hot air current in the hypocaust structure.
